Model Designer

Description

Allows the creation and design of models. Models are custom tools that combine elementary tools and variables.

How to design a model in QGIS?

Access

In the top ribbon, open the 'Processing' menu and click on 'Graphical Modeler…'

1. Name your model.

2. Save your model in your project folder.

3. Add one or more input(s) to your model.

4. Add one or more algorithm(s) (a.k.a. tools) to your model.
